are unable to cope effectively with the citizenship. This being an unquestioned fact there remains only one alternative offered to practical statesmen; either to stand upon the propowhich, as the States can not, the Nanot propose to waste any space, arguing the first of those two propositions. We take our stand upon the broad platform that universal suffrage must be based upon something like universal education, and that where a large section of the country is unable to furnish its people with school facilities, and lowing letter to Henry R. Low the thirty, forty, and in some States over fifty per cent. of the voters are ignorant men, a grave National emergency has arisen, before which strict constructionist dogmas must give way .-Boston Globe.

MANLY WORDS.

President Cleveland's Attitude and the Peevish, Shuffling Complaints of Senator Edmunds.

The fearless, ringing words of the President to the Senate struck home. The Republican organs are furious and are piping forth dissonances of the most horrible description. Following the lead of the Vermont Senator, they profess to be shocked at the audacity of the President in lecturing that august body. Their ox is gored this time and theyedo not like the operation. Of course, it was all right and natural for Mr. Edmunds to lecture the President and ask impertinent questions, but Mr. Cleveland had no right to talk back. The position in which those Republican Senators have placed themselves is an exceedingly uncomfortable one. Their efforts to extricate themselves is childish in the extreme. Mr. Edmunds thinks that the President is like Charles I. in telling the Senate what to do and what it should not do. The Vermont Senator appears to be of the opinion that the President should remain perfectly passive under all uncalled for assaults and should permit the "august" body of which Mr. Edmunds is a member to address insolent questions to the heads of departments on subjects for which he is wholly responsible. Mr. Edmunds can not be well read in English history or he would not have made the egregious blunder of bringing in the case of Charles L to support his argument.

What connection there is between President Cleveland's refusal to give up private and unofficial documents, which are his sole property, on the il-legal demand of Republican Senators, and the action of the autocratic Stuart. and the action of the autocratic Stuart, in force, and the stock is taken under it, it who desired to levy taxes without the sanction of Parliament, and flung so, to carry out with us the agreement they sanction of Parliament, and flung members into prison for disagreeing these roads. It will involve new agreements, with him, we leave it to the muddled however, on both sides. I have, however, no members into prison for disagreeing intellect of the statesman from the interest in the purchase recently made, and no investment in nor commutal to the r gen-eral enterprise. Prior to the disclosures of the President quickly made on this investigation I looked upon it as The message of the President quickly disposes of the idle excuses brought shape satisfactory to me from a business forward by Mr. Edmunds in support of his unauthorized demands. It has the ring of the true metal. The writer exact relation to it. What effect this investithoroughly understands the situation and explains it with characteristic force and directness. There is a delicate vein of sarcasm in the answer to the charge that have upon it, and whether I shall ever join it, are as open questions for me as for any one else. If my connection with the transactions I have mentioned is in any respect open to just criticisms, I am not aware of it. Respectfully yours, that, because those private documents are preserved in public offices, the Senate has a right to demand them. "There is no mysterious power of lessness exhibited in the present session transmutation," remarks Mr. Cleve- by the hitherto cool and deliberate land, "in departmental custody, nor is there magic in the undefined and sacred solemnity of department files." statesman, Senator Edmunds, of Vermont, finds something like an explanation in the statement that he is trying

The Democratic party has additional to earn a re-election, with the chances reason to be proud of its fearless, out-spoken leader, who knows so well how lican.

to protect the interests intrusted to him and to maintain the dignity of his high office. What a contrast between the peevish, shuffling complaints of Mr. Edmunds and those strong, earnest words of the President: "The pledges gument which practically take it out of I have made were made to the people, the domain of party questions. It is and to them I am responsible for the manner in which they have been redeemed. I am not responsible to the Senate, and I am unwilling to submit my actions and official conduct to them for judgment." The minority report of the Senate Judiciary Committee is a States that the Nation should aid them fitting accompaniment to this Jackin the work of educating their people. sonian message and sets forth the lawlessness and insolence of Mr. Edmunds strict constructionist view, which in- and his colleagues in the strongest sists that education is a matter that be- light. The madness which is the forelongs to the States and ought to be left runner of total destruction, appears to in their exclusive charge. But the day have taken a firm hold of the Repubhas long since passed when a narrow liean party. The course on which the and rigid interpretation of the consti- Republican Senators have entered is tution can be successfully invoked as a one which the American public will barrier against measures that are in emphatically condemn. - Albany Argus.

RIGHTEOUS INDIGNATION The President's High-Minded Suggestions

Regarding the Chinese Outrages. Congress has no excuse for hesitancy subjects for the losses caused by the outrages committed by aggressors who, The facts of the present case appear as the President says, "happily for the

of the Southern States, while in no one of all responsibility in the premises. of them is the number of illiterate Blaine dismissed the matter in even a more peremptory style. But it will become a National disgrace if the Rock Springs untion must provide a remedy. We do fortunates be not reimbursed as the President suggests .- Chicago News.

AN HONEST LETTER.

Secretary Whitney's Connection with the Broadway Street Railways.

Secretary Whitney has sent the fol-Chairman of the Senate committee of the New York Legislature investigating the Broadway railroad matter: I take the liberty of addressing this note to

you because you are charman of the com-mittee authorized to investigate the methods by which the consent of the Board of Alderallroad now laid upon Broadway, and because the public press has more than once associated my name with the subject of your upury It's, perhaps, an irevitable penalty of holding public office that any association, nowever nonorable with transactions or persons thereafter subjected to public obloquy should be made an occasion for misropresentation, and I therefore desire to enable every body who wishes to do so to form a correct judgment as to my connection with these matters. Mr. James A. Roosevelt, Mr. George Henry Warren, Mr. George G. Haven, Mr. Brayton Ives, myself and other citizens of New York were directors of a company which had promptly availed itself of the general street railroad law of 1884 and was the first company to lay claim to a railroad from the Battery to Fourteenth street. In behalf of our company we labored earnestly to prevent Mr. Sharp and his associates from obtaining the consent of the Board ons thereafter subjected to public obloque crates from obtaining the consent of the Board of Aldermen. We used all proper means at our command to make this opposition effect-ual, and we stremously insisted that the pryclege should be sold at public auction to the highest bidder. When these efforts failed we appealed to the mayor who vetoed the ordinance. It was passed over his veto. We then attacked the validity of the resolution, and as we had no right of action ourselves furnished legal sid to property-owners for the purpose. Subsequently, in deference to public sentiment, aroused in great degree by our efforts. Mr. Sharp and his associates abandoned the resolution and procured the passage of a new one, with conditions favorable to the city and conditioned upon annual payments based upon a valuation of a million dollars or more for the franchise. Some time afterward pur ties from Philadelphia informed us that they were arranging for leases of the lines in Broadway and Seventh avenue and intended to lease other lines, and thus, by introducing economy of management and a system of transfers, secure at the same time returns from the properties and greater accommoda-tions for the public. They proposed to us to abandon our attitude of hostility and take part in the new enterprise, which proposition was accepted by a large majority of our stockhoiders, including myself, and by a majority in interest of the stock excluding mine. It was in the line of what we had been advocating as in the public interest. We had protested against a grant of Broadway without conditions providing for acceptance of the stock of the conditions providing for a general transfer system applicable to it. It was subsequent-ly discovered that the lease could not be obtained, and the Philadelph'a parthe stock by the contract made public on February 3, 1886. If that contract remains made when they expected to obtain a lease of

N. C WHITNEY. -The surprising zeal and reckNEW GOLD FIELDS.

The Extensive Auriferous Laver Recently Found lu Patagonia.

Ever since the discovery of America by Europeans the bleak and barren peninsula of Patagonia has been considered as nearly worthless as any portion of the globe, and it has been only noted for the production of penguins its climate was cold and cheerless, and gar; mix all well together and serve. vegetable productions wanting, has for centuries prevented any careful exploration and examination of its resources. All this history is now about to be reversed. Absolutely reliable information has just reached this country that one of the most extensive and rich gold fields of the world has been discovered there. It is very probable that within the next few months there will be an influx of gold-hunters there only second to that

which flooded California in '49. The facts in regard to this wonderful discovery are furnished by E. L. Baker, Consul-General to the Argentine Republic. The points in his report were obtained from a report made by a commission appointed by the Argentine Republic. Among other things that report says: "According to the opinion of the mining engineer who has examined the case the auriferous layer extends along the coast all the way from Cape Nirgin to the north of the Barrancas del Condor, a distance of forty miles, and it is possible that it may extend to Rio Gallegos. The engineer thinks that these gold deposits are of a superior class, and that there is abun-

dance of both gold and platinum.' There has never been any considerable gold mining in this part of South America, and the natives have but the crudest notions of how to proceed in the work of taking out the gold. Great excitement, however, prevails, and the Chilians are already hard at work. One hundred of them from Sandy Point have been at work in a body. They have only the crudest and most primitive appliances, which they have improvised on their own account. But, nevertheless, they have collected, on an average, one hundred and seventyfive grams, or seven dollars, per day each. One Chilian who has been operating alone took out in a month five pounds of gold, or about one thousand

ollars' worth. Mr. Baker says that it is impossible now to estimate the extent or the wealth of the washings, but they are thought to be as rich or richer than those of California and Australia. While giving all these facts, Mr. Baker advises that no rush be made to these new mines until them. It is very probable that considerable of a struggle will be the result of this find in regard to who shall mine. The Chilians are particularly aggressive, and will probably claim pretty much every thing. It would seem that, with the introduction of the placer process and Yankee skill, there would be a great deal in the new discovery .- Washington

WORK FOR WOMEN.

▲ Caution Against Fraudulent Advertise ments, Issued by the Women's E. and L.

Union of Boston The Women's Educational and Industrial Union of Boston, Mass., cautions all women to be warv of advertisements and circulars promising-on receipt of a certain sum-work at home, with large earnings. We are receiving letters from women far and near who have been defrauded by these promises. Either the person for warding the money gets no answer at all, or the materials and implements sent are of little worth, or the finished work is rejected even if well done, or other obst are placed in the way, (the object being simply to get rid of her). The parties ad-vertising make frequent changes of name and address, with some difference in circulars. They are now sending out through the United States, Canada and the Prov-inces, hundreds of thousands of plausible circulars, well calculated to deceive, for not many of the hundreds of thousands of women receiving them are aware that by a single advertisement any city firm can get Learning that this evil can best be checked by enlightening the public, we solicited the aid of the press, and the following continuous notice appears in our daily

papers, each in turn giving it one week's insertion: "The Women's Educational and Industrial Union, 74 Boyiston street, will gladly give in-formation regarding circulars and advertisements offering to women work at home. It is earnostly desired that newspapers everywhere help to enlighten the public by copying the whole of this present article and by giving the above notice, or a similar one, frequent insertions; also that Women's Associations, variously located, join us in this work, and by suitable advertising make themselves known as centers of information. Any needed assistance from us will be gladly rendered. Individuals can aid by procuring the insertion of this article in their local papers.

Such general concurrence of effort will save multitudes of women from sorrow and loss, work effectively against the swindlers and promote the interests of the

honest advertisers. MRS. ABBY MORTON DIAZ.
President Women's E. and I. Union.

BEE-KEEPING.

Suggestive Hints Regarding the Cost and Profits of Apiculture.

A great many "big stories" have appeared in print about the profits in beekeeping, and some books have evidently been printed for the sole purpose of "booming" the market-the market for bees and the market for hives and "supplies." In the first place consider your adaptability to the business. If you can not stand still and be stung without flinching it is possible that you will not succeed. At first, at least, wear a vail and gloves, even if the old bee-keeper laughs, and tells how he hives bees by scooping them up with his bare hands. Decide upon the frame to be used, and then get a box to fit the frame. It ought not to cost more than a dollar, and may be found for less. There is no disgrace in beginning bee-keeping with a soapbox for a hive, but it must be sufficient to keep out the rain. If you are to begin with one colony, all you need is two hives, frames, a vail, gloves and a smoker. The last named you will discard by and by, but it gives confidence to beginners.

A colony of bees, the best Italians, with choice queen, on ten frames in a good hive, good enough, need not cost more than ten dollars, and may be bought for less. The price includes all, bees, queen, hive and frames. If you pay more, you have money to throw away. Buy as near home as possible, to save express and save bees.

The colony will send but one swarm at least, if in good condition. That ity, from bad habits, from uncleanligives 100 per cent. increase in bees. The two colonies will produce honey available outlet, passing out through worth at least \$2.50; probably much more, but suppose it is only \$2.50. The profit, then, not counting labor, would be 25 per cent. If you make up your mind to be satisfied with that, you will not be disappointed.—N. E. Farmer.

HOME AND FARM.

-From the best information available Farm and Fireside concludes that any of the incubators will hatch eggs-"if you sit by them day and night and don't sleep too long at a time."

-Horseradish Sauce: Grate four ounces of horseradish, to which add four ounces of bread crumbs and press through a sieve. Add a glass of cream, and long-eared Indians. The fact that a pinch of salt, a tablespoonful of vine-

-Peached Eggs: Put in a flat saucepan three pints of water, a tablespoonful of vinegar and two pinches of salt. When the water boils break your eggs into it and let them poach two or three minutes. Lift them out with a skimmer and serve each egg on toast.—Exchange.

-The mule is useful on the farm, and more use could be made of these hardy animals to advantage. Especially are they well adapted to the plow, and for use in clearings and for use in new ground, where it is dangerous to us the more delicate horse. - San Francisco Chronicle.

-A danger to be avoided in keeping fowls is overcrowding. Too many, after building a house of proper dimensions for the first lot, neglect to enlarge the quarters as they enlarge the flock. Where the extensive business is carried on the fowls should be separated in small flocks; they will not do their best until this is done. - Chicago Tribune.

-Pickled Ham: This is a country delicacy. It should be small, a pig's ham and sugar-cured, but not smoked. Simmer for three hours, then take of the skin, stick in a few cloves and bake for half an hour, basting it frequently with brown sugar dissolved in eider. It will be found deficious, something between ham and roast pork. - Good House-

-Fried Onions: Having peeled the onions, cut them in rings and throw them into enough very hot fat in the frying-pan to float them. If the fat is kept at the right heat the onions will not require much attention while cooking. As soon as they are golden brown take them out of the pan with a skimmer and throw them on to paper to absorb the grease.—Boston Budget.

-Hashed Beef: Take two pounds of cold beef, free from sinew, and bone and chop it up well. Peel and cut in pieces two onions and put them in a fryingpan with two ounces of butter. When beginning to color very lightly add your beef, a little salt, pepper and nutmeg and a pinch of thyme. Toss altogether on the fire ten minutes. Just before serving sprinkle a little chopped parsley something more definite is known about over the top of your hash. - The House-

-It frequently happens that, from long neglect, plate becomes so stained and spotted that it can not be immediately restored by any of the plate-powders. Whenever this occurs, mix one part of salammoniac with sixteen parts of vinegar. Rub the stains or spots gently with the mixture; they will soon disappear. The plate should then be well washed in soap and water.—Farm and Home.

PREVENTION OF DISEASE. Health and Sickness Dependent Upon the Observance of Nature's Laws.

If "an ounce of prevention is worth a pound of cure" in the ordinary affairs of life, it is doubly so in the matter of disease, health and disease depending on the observance or non-observance of the laws of our being, or the conditions of health. These laws are as easily learned as those of chemistry, astronomy, etc., while they are of most practical value to us, our happiness largely being the result of a good physical condition. As we were created, "fearfully and won-

derfully made," to remain in health was

of the blood and other fluids. Naturally, we are in health so long as nothing is done to produce disease. And here, I will remark, that what we usually regard as diseases are simply the outward signa of an internal derangement, symptoms, the indications, or what results from the recuperative efforts of nature in removing internal difficulties. Thus, a cough which should never be stopped, not abruptly, if at all, only so far as it is done by the removal of the cause, or causes, at which there is no occasion for its continuance, is an indication that there is something in the lungs, if a lung cough, which should be removed, as a means of preventing more serious effects. Let nature alone! Let the cough continue till it has performed its mission, simply aiding nature in the removal of the cause. It is easy to prevent the accumulation in the lungs, by cleanli-ness, by "breaking a cold," opening the pores, that the accumulations of waste and dead matters may pass off through these pores, rather than pass to the lungs, ejected by coughing. Vomiting is not the disease, but an ef-

fort of nature to purify, cleanse aside from foul stomach, which the undigested accumulations might ferment and putrify, contaminating the whole body, a veritable case of "blood-poisoning." Instead of giving opiates to stop such natural and necessary vomiting, it is well to fill the stomach as full as possible with warm water, making the act an easy one, at the same time thoroughly cleansing that organ.

When, in consequence of over-eating, or from some natural obstructions. there is violent purging, as if all of the ducts of the body were opened, throwing their contents into the bowels, in a friendly way, rapidly carrying off poisonous accumulations, preventing other and worse derangements, purifying the system as no other means can do, at the most rapid rate, it is folly, madness to attempt to stop this discharge, which should be encouraged by all possible means, giving cathartics, if the ever should be given (or injections of warm water). Never interfere with nature, since God speaks through nature. Proper dieting will prevent this occasion for nature to interfere, to institute recuperative measures. As a general principle, those who eat properly, using only foods which can be easily digested, and who are cleanly in all respects, will have no such symptoms, no occasion for nature to interfere, to cure an internal derangement. The same principles apply to boils and general eruptions. When there is internal impurness, nature seeks the nearest and most openings made by herself, the effete matters which, otherwise, might induce fevers, inflammations, organic diseases, those of a more serious character. It is wise and safe for us, in our blindness, to "mind our own business," sitting and learning at nature's feet .- Dr.

Hanaford, in Golden Rule. -A man at Waco, Neb., hitched his horse to a rocking-chair and took a A NOBLE DOG.

One Creature of an Ahnsed Kind That Earned More than Its Salt. (Birmingham (Ala.) Age.

J. E. Walter, the master of train services of the Louisville & Nashville railroad, has a dog he values highly. The dog is a Newfoundland, and has been raised by his owner from a small puppy. Mr. Walter has a little girl who is fond of the animal, and the affection between the two is interesting. A few mornings since the little girl was left in the room alone by a large fire in the grate. She went too near the blaze and the dog opened the door and entered. He went to her and began to pull her away by catching her clothing in his teeth. The two companions played about the room for some time, until the little girl grew tired and sleepy. She went too near the fire again, and the dog could not get her away. He pulled at her clothes for some time, but could not arouse her. He then hurried to her mother's room and began to act strangely by rubbing against her hand and catching her dress, pulling her toward the door. She caressed him and told him to go away and find little Nellie. He made a strange whining noise with his mouth, and then slowly walked back to where the little one was sleeping. The fire was growing hotter and the little one was sleeping, unconscious of her great danger. The dog made another attempt to arouse her and failed. He then crouched down beside her, between her and the fire. taking care to protect her well. Mrs. Walter entered the room a few minutes later and found the noble dog in this position whining and crying, while the hair was being singed from his back. Little Nellie was sleeping sweetly.
